## GCSE

## Specimen 2018

Time allowed: 1 hour 45 minutes

## Materials

For this paper you must have:

- a ruler
- a calculator.

## Instructions

- Answer all questions in the spaces provided.
- Do all rough work in this book. Cross through any work you do not want to be marked.

## Information

- There are 100 marks available on this paper.
- The marks for questions are shown in brackets.
- You are expected to use a calculator where appropriate.
- You are reminded of the need for good English and clear presentation in your answers.
- When answering questions $02.7,10.4$ and 11.2 you need to make sure that your answer:
- is clear, logical, sensibly structured
- fully meets the requirements of the question
- shows that each separate point or step supports the overall answer.

## Advice

In all calculations, show clearly how you work out your answer.

Please write clearly, in block capitals.
Centre number $\square$ Candidate number $\square$
Surname $\square$
Forename(s) $\square$

Candidate signature $\qquad$

Figure 1 shows a diagram of the human heart.

Figure 1

| $\mathbf{0}$ | $\mathbf{1}$ | $\mathbf{1}$ What part of the heart is labelled $\mathbf{A}$ ? |
| :--- | :--- | :--- | :--- |

Tick one box.

Aorta $\square$
Atrium $\square$
Valve $\square$
Ventricle $\square$

| $\mathbf{0}$ | $\mathbf{1} .2$ | $\mathbf{2}$ Where does the pulmonary artery take blood to? |
| :--- | :--- | :--- |

Tick one box.

Brain $\square$
Liver $\square$
Lungs $\square$
Stomach $\square$

| 0 | 1 | 3 |
| :--- | :--- | :--- |

Question 1 continues on the next page

The coronary arteries supply blood to the heart.
Figure 2 shows two coronary arteries.

Figure 2

| 0 | 1 | 4 | Describe two ways the healthy artery is different from the artery affected by coronary |
| :--- | :--- | :--- | :--- | heart disease.

[2 marks]
1
$\qquad$
2
$\qquad$

| $\mathbf{0}$ | $\mathbf{1}$ | $\mathbf{5}$ What can be used to treat people with coronary heart disease? |
| :--- | :--- | :--- | :--- |

Tick two boxes.

Antibiotics $\square$
Hormones $\square$
Statins $\square$
Stent $\square$
Vaccination $\square$

| $\mathbf{0}$ | $\mathbf{1}$ | 6 | Suggest two risk factors for coronary heart disease. |
| :--- | :--- | :--- | :--- |

Figure 3 shows the percentages of adults in the UK who have coronary heart disease.

Figure 3

| $\mathbf{0}$ | 1 | $\mathbf{7}$ | Calculate the difference in the percentage of male and female adults |
| :--- | :--- | :--- | :--- | aged 65 and over who have coronary heart disease.

| 0 | 1 | 8 |
| :--- | :--- | :--- | Which is the correct conclusion for the data in Figure 3?

Tick one box.

Children do not suffer from coronary heart disease $\square$
More males suffer from coronary heart disease than females $\square$
More younger people suffer from coronary heart disease than older people $\square$

## Turn over for the next question

Catalase is an enzyme.
Catalase controls the following reaction:

$$
\text { hydrogen peroxide } \longrightarrow \text { water }+ \text { oxygen }
$$

A student did an investigation on catalase activity.
This is the method used.

1. Put $1 \mathrm{~cm}^{3}$ hydrogen peroxide solution in a test tube.
2. Add $1 \mathrm{~cm}^{3}$ of catalase solution.

- Bubbles of oxygen are produced.
- Bubbles cause foam to rise up the tube.

3. Measure the maximum height of the foam.

Figure 4 shows the experiment.

Figure 4

The experiment is carried out at $20^{\circ} \mathrm{C}$.

Table 1 shows some results from the investigation.

## Table 1

| Temperature <br> in ${ }^{\circ}$ C | Maximum height of foam in cm |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Test 1 | Test 2 | Test 3 | Mean |
| 10 | 1.3 | 1.1 | 0.9 | 1.1 |
| 20 | 0.0 | 3.3 | 3.1 | 3.2 |
| 30 | 5.2 | 5.0 | 5.3 | 5.2 |
| 40 | 4.2 | 3.5 | 4.4 | 4.0 |
| 50 | 2.1 | 1.9 | 2.3 | 2.1 |
| 60 | 0.0 | 0.0 | 0.0 | 0.0 |

| $\mathbf{0}$ | $\mathbf{2}$ | $\mathbf{1}$ | $\mathbf{1}$ Why did the student carry out the experiment three times at each temperature? |
| :--- | :--- | :--- | :--- |

Tick one box.

To make the experiment more accurate $\square$
To prove the experiment was correct $\square$
To show the experiment was more repeatable $\square$

Circle the anomaly in Table 1.

| $\mathbf{0}$ | $\mathbf{2}$. | $\mathbf{3}$ What did the student do with the anomalous result? |
| :--- | :--- | :--- |

$\qquad$ $\longrightarrow$

Question 2 continues on the next page

| 0 | 2 | 4 |
| :--- | :--- | :--- |

What conclusion can be made as the temperature increases?
[1 mark]
Tick one box.

Decreases the rate of reaction up to $30^{\circ} \mathrm{C}$ $\square$
Decreases the rate of reaction up to $40^{\circ} \mathrm{C}$

Increases the rate of reaction up to $30^{\circ} \mathrm{C}$

Increases the rate of reaction up to $40^{\circ} \mathrm{C}$

| $\mathbf{0}$ | $\mathbf{2}$. | $\mathbf{5}$ At which temperature was catalase denatured? |
| :--- | :--- | :--- |

Tick one box.
$10^{\circ} \mathrm{C}$ $\square$
$30^{\circ} \mathrm{C}$ $\square$
$40^{\circ} \mathrm{C}$ $\square$
$60^{\circ} \mathrm{C}$ $\square$

| $\mathbf{0}$ | $\mathbf{2}$ | $\mathbf{6}$ The student thought the optimum temperature for catalase activity was between |
| :--- | :--- | :--- | :--- | $30^{\circ} \mathrm{C}$ and $40^{\circ} \mathrm{C}$.

How could the investigation be improved to find a more precise value for the optimum temperature?

Tick one box.

Do the experiment at $70^{\circ} \mathrm{C}$ and $80^{\circ} \mathrm{C}$ $\square$
Do the experiment at $30^{\circ} \mathrm{C}, 35^{\circ} \mathrm{C}$ and $40^{\circ} \mathrm{C}$ $\square$
Use less hydrogen peroxide solution $\square$
Use more catalase solution $\square$

| $\mathbf{0}$ | $\mathbf{2}$ | $\mathbf{7}$ | Amylase is the enzyme that controls the breakdown of starch to glucose. |
| :--- | :--- | :--- | :--- |

Describe how the student could investigate the effect of pH on the breakdown of starch by amylase.

 $\longrightarrow$ $\longrightarrow$
$\qquad$
$\qquad$
$\qquad$

## Turn over for the next question

| 0 | $\mathbf{3}$ | Figure 5 shows a human cheek cell viewed under a light microscope. |
| :--- | :--- | :--- |

Figure 5

| 0 | 3 | . | $\mathbf{1}$ |
| :--- | :--- | :--- | :--- |

| $\mathbf{0}$ | $\mathbf{3}$ | $\mathbf{2}$ Cheek cells are a type of body cell. |
| :--- | :--- | :--- | :--- |

Body cells grow through cell division.
What is the name of this type of cell division?
Tick one box.

Differentiation

Mitosis

Specialisation $\square$

| 0 | 3 | 3 | Ribosomes and mitochondria are not shown in Figure 5. |
| :--- | :--- | :--- | :--- |

What type of microscope is needed to see ribosomes and mitochondria?
$\qquad$

| $\mathbf{0}$ | $\mathbf{3} .4$ What is the advantage of using the type of microscope you named in part 03.3? |
| :--- | :--- | :--- |

Tick one box.
$\square$
$\square$

Cheaper
Higher magnification
Lower resolution
 The width of the cell is shown by the line $\mathbf{D}$ to $\mathbf{E}$.

Figure 6

Calculate the width of the cheek cell in micrometres ( $\mu \mathrm{m}$ ).
Complete the following steps.

Measure the width of the cell using a ruler

Use the equation to work out the real width of the cell in mm :
real size $=\frac{\text { image size }}{\text { magnification }}$ mm

Convert mm to $\mu \mathrm{m}$ $\mu \mathrm{m}$

## Question 3 continues on the next page

| 0 | 3 | $\mathbf{6}$ | A red blood cell is $8 \mu \mathrm{~m}$ in diameter. |
| :--- | :--- | :--- | :--- |

A bacterial cell is 40 times smaller.

Calculate the diameter of the bacterial cell.
Tick one box.

| $0.02 \mu \mathrm{~m}$ | $\square$ |
| :--- | :--- |
| $0.2 \mu \mathrm{~m}$ | $\square$ |
| $2.0 \mu \mathrm{~m}$ | $\square$ |
| $20.0 \mu \mathrm{~m}$ | $\square$ |

| 0 | 4 |
| :--- | :--- | Microorganisms can cause disease.

| 0 | 4 | 1 |
| :--- | :--- | :--- |
| Draw one line from each disease to the correct description. |  |  |

## Disease

Salmonella

Can increase the chance of infections such as preumonia.

Part of the life cycle includes an insect.

Spread by coughs and sneezes.
Description
Can be spread by not washing hands thoroughly.

Treated with stem cells.

Treated with fungicides.

Question 4 continues on the next page

| 0 | 4 | 2 |
| :--- | :--- | :--- |

A bacterium causes gonorrhoea.

What are the symptoms of gonorrhoea?
Tick two boxes.

Headache $\square$
Pain when urinating $\square$
Rash $\square$
Vomiting $\square$
Yellow discharge $\square$

Table 2 shows the number of people in the UK diagnosed with gonorrhoea in different years.

Table 2

|  | Number of people diagnosed <br> with gonorrhoea in thousands |  |
| :---: | :---: | :---: |
| Year | Female | Male |
| 2005 | 5.0 | 12.5 |
| 2007 | 5.0 | 12.5 |
| 2009 | 5.5 | 12.0 |
| 2011 | 6.0 | 14.0 |
| 2013 | 7.5 | 22.0 |

| 0 | 4 | 3 | 3 |
| :--- | :--- | :--- | :--- |

- The numbers for males have already been plotted.
- Only some of the numbers for females have been plotted.

Figure 7

| $\mathbf{0}$ | $\mathbf{4}$ | $\mathbf{4}$ Describe the patterns in the numbers of males and females with gonorrhoea from |
| :--- | :--- | :--- | :--- | 2005 to 2013.

Use the data in Figure 7.
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
Question 4 continues on the next page

| 0 | $\mathbf{4}$ | $\mathbf{5}$ | Gonorrhoea is treated with an antibiotic. |
| :--- | :--- | :--- | :--- |

HIV is another sexually transmitted disease.

Explain why prescribing an antibiotic will not cure HIV.
$\qquad$
$\qquad$
$\qquad$

| 0 | 5 | Anaerobic respiration happens in muscle cells and yeast cells. |
| :--- | :--- | :--- |

The equation describes anaerobic respiration in muscle cells.
glucose $\longrightarrow$ lactic acid

| 0 | 5 | 1 |
| :--- | :--- | :--- | How can you tell from the equation that this process is anaerobic?

$\qquad$
$\qquad$

| $\mathbf{0}$ | $\mathbf{5} .2$ | 2 |
| :--- | :--- | :--- | muscle cells.

Explain why.
$\qquad$
$\qquad$
$\qquad$
$\qquad$

Question 5 continues on the next page

Figure 8 shows an experiment to investigate anaerobic respiration in yeast cells.

Figure 8

| $\mathbf{0}$ | $\mathbf{5}$. | $\mathbf{3}$ What gas will bubble into Tube $\mathbf{B}$ ? |
| :--- | :--- | :--- |

Tick one box.

Carbon dioxide
Nitrogen
$\square$

Oxygen $\square$
Water vapour $\square$

$\qquad$
$\qquad$
$\qquad$
$\qquad$

| 0 | 5 | 5 | Anaerobic respiration in yeast is also called fermentation. |
| :--- | :--- | :--- | :--- | :--- |

Fermentation produces ethanol.

Give one use of fermentation in the food industry.

## Turn over for the next question

There are no questions printed on this page

| 0 | 6 |
| :--- | :--- |
| Plants have adaptations to help defend themselves and to help them survive. |  |

Figure 9 shows a nettle plant.

Figure 9

| 0 | 6 | 1 |
| :--- | :--- | :--- |

$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
Question 6 continues on the next page

Witch hazel is another plant adapted for defence.
Witch hazel produces oil with antiseptic properties. The oil prevents bacteria from attacking the plant.

A student investigated how effective three different plant oils were at preventing the growth of bacteria.

Figure 10 shows the results.

Figure 10

| $\mathbf{0}$ | $\mathbf{6}$. 2 Which plant oil is the most effective at preventing the growth of bacteria? |
| :--- | :--- | :--- |

Give a reason for your answer.

Oil
Reason

| 0 | 6 | 3 | The student tested tea tree oil using the same method. |
| :--- | :--- | :--- | :--- |

The results showed tea tree oil was the most effective at preventing bacterial growth.
The student concluded that tea tree oil could be used to treat bacterial infections instead of antibiotics.

Give one reason why this is not a valid conclusion.

## Turn over for the next question

| 0 | 7 | After a meal rich in carbohydrates, the concentration of glucose in the |
| :--- | :--- | :--- | small intestine changes.

Table 3 shows the concentration of glucose at different distances along the small intestine.

Table 3

| Distance along the small <br> intestine $\mathbf{i n} \mathbf{~ c m}$ | Concentration of <br> glucose in $\mathbf{~ m o l ~}_{\mathbf{~ d m}}{ }^{\mathbf{3}}$ |
| :---: | :---: |
| 100 | 50 |
| 300 | 500 |
| 500 | 250 |
| 700 | 0 |

| $\mathbf{0}$ | $\mathbf{7}$. | $\mathbf{1}$ | At what distance along the small intestine is the glucose concentration highest? |
| :--- | :--- | :--- | :--- |

[1 mark]
cm

| 0 | 7 | 2 |
| :--- | :--- | :--- | Use the data in Table 3 to plot a bar chart on Figure 11.

- Label the $y$-axis.
- Choose a suitable scale.

Figure 11

## Question 7 continues on the next page

Look at Figure 11 on page 27.

| 0 | 7 | $\mathbf{3}$ Describe how the concentration of glucose changes as distance increases along the |
| :--- | :--- | :--- | :--- | small intestine.

$\qquad$

$\qquad$
$\qquad$

| $\mathbf{0}$ | $\mathbf{7}$ | $\mathbf{4}$ Explain why the concentration of glucose in the small intestine changes between |
| :--- | :--- | :--- | :--- | 100 cm and 300 cm .

Tick one box.

| $\mathbf{A}$ |  |
| :--- | :--- | $\square$ C | $\mathbf{D}$ |  |
| :--- | :--- |

| $\mathbf{0}$ | $\mathbf{8}$ | . | $\mathbf{2}$ |
| :--- | :--- | :--- | :--- |

Tick one box.
A

D

| $\mathbf{0}$ | $\mathbf{8}$ | $\mathbf{3}$ Give one variable that was kept constant in this experiment. |
| :--- | :--- | :--- | :--- | :--- |

$\qquad$
$\qquad$

| 0 | 8 | 4 |
| :--- | :--- | :--- | phosphate ions.

A farmer wanted to compare the percentage of minerals in two types of manure.

- Cow manure from her own farm.
- Chicken manure pellets she could buy.

Table 4 shows data for each type of manure.

Table 4

|  | Phosphate ions in \% | Potassium ions in \% |
| :--- | :---: | :---: |
| Cow manure | 0.4 | 0.5 |
| Chicken manure pellets | 2.5 | 2.3 |

Suggest one advantage and one disadvantage of using the chicken manure pellets compared to the cow manure.

Advantage

Disadvantage

There are no questions printed on this page

| 0 | 9 | Plants transport water and mineral ions from the roots to the leaves. |
| :--- | :--- | :--- |

| 0 | $\mathbf{9}$ | $\mathbf{1}$ Plants move mineral ions: |
| :--- | :--- | :--- |

- from a low concentration in the soil
- to a high concentration in the root cells.

What process do plants use to move these minerals ions into root cells?
Tick one box.

Active transport

Diffusion $\quad \square$
Evaporation $\quad \square$
Osmosis $\quad \square$

| $\mathbf{0}$ | $\mathbf{9} .2$ | Describe how water moves from roots to the leaves. |
| :--- | :--- | :--- |

$\qquad$
$\qquad$
$\qquad$
$\qquad$

Question 9 continues on the next page

Plants lose water through the stomata in the leaves.
The epidermis can be peeled from a leaf.
The stomata can be seen using a light microscope.

Table 5 shows the data a student collected from five areas on one leaf.

Table 5

| Leaf <br> area | Number of stomata |  |
| :---: | :---: | :---: |
|  | Upper surface | Lower surface |
| 1 | 3 | 44 |
| 2 | 0 | 41 |
| 3 | 1 | 40 |
| 4 | 5 | 42 |
| 5 | 1 | 39 |
| Mean | $\mathbf{2}$ | $\mathbf{X}$ |

| $\mathbf{0}$ | $\mathbf{9}$. | $\mathbf{3}$ Describe how the student might have collected the data in Table 5. |
| :--- | :--- | :--- | :--- |

$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$

| $\mathbf{0}$ | $\mathbf{9} .4$ What is the median number of stomata on the upper surface of the leaf? |
| :--- | :--- | :--- |

| $\mathbf{0}$ | $\mathbf{9}$. | $\mathbf{5}$ Calculate the value of $\mathbf{X}$ in Table 5. |
| :--- | :--- | :--- | :--- |

Give your answer to 2 significant figures.
$\qquad$
$\qquad$
Mean number of stomata on lower surface of leaf =

| $\mathbf{0}$ | $\mathbf{9}$. 6 The plant used in this investigation has very few stomata on the upper surface |
| :--- | :--- | :--- | of the leaf.

Explain why this is an advantage to the plant.
$\qquad$
$\qquad$
$\qquad$
$\qquad$

## Turn over for the next question

| 1 | $\mathbf{0} \quad$ Tobacco mosaic virus (TMV) is a disease affecting plants. |
| :--- | :--- |

Figure 13 shows a leaf infected with TMV.

Figure 13

| $\mathbf{1}$ | $\mathbf{0}$. | $\mathbf{1}$ All tools should be washed in disinfectant after using them on plants infected |
| :--- | :--- | :--- | :--- | with TMV.

Suggest why.
$\qquad$
$\qquad$

| 1 | $\mathbf{0} .2$ | Scientists produced a single plant that contained a TMV-resistant gene. |
| :--- | :--- | :--- |

Suggest how scientists can use this plant to produce many plants with the TMV-resistant gene.
$\qquad$
$\qquad$

| 1 | 0 | 3 |
| :--- | :--- | :--- |

Describe how you would test for the presence of glucose in fruit.
$\qquad$
$\qquad$
$\qquad$
$\qquad$

10 . 4 TMV can cause plants to produce less chlorophyll.
This causes leaf discoloration.

Explain why plants with TMV have stunted growth.
